PAINTING OF 44

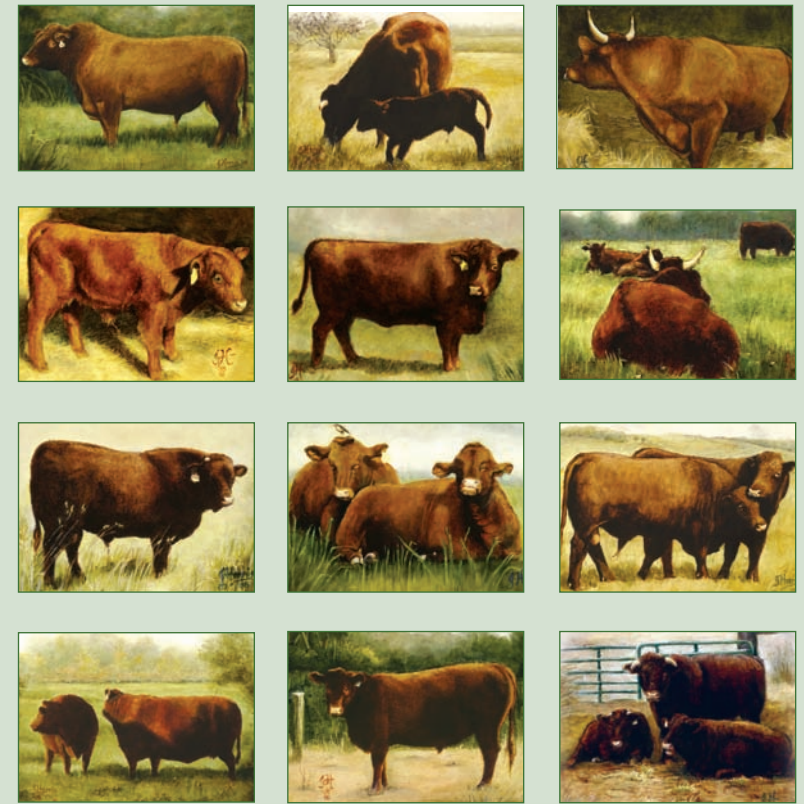

PHOTOGRAPH OF 44

JOAN HARRIS

This is the fourth Devon calendar Joan Harris has produced. The artist feels privileged to have such inspiring models. The paintings reproduced on this calendar are painted with love for the Devon's purity, form, color, disposition, efficiency, and history. The artist attempts to make a faithful representation of each animal. Shown is a reproduction of the painting of #44 (May 2009) and below it the photograph used as a reference for that painting.

HARRIER FIELDS FARM

Mike Scannell established Harrier Fields Farm in 1983. Located in the historic Hudson Valley of New York State, the farm raises Devon seedstock and a few crossbred Devons for beef. The herd consists of thirty plus select cows. The foundation cows at Harrier Fields Farm came from the Buckeye herd and have been bred exclusively to Rotokawa sires. The farm is also home to part of the Bakewell herd imported from Ken McDowall of New Zealand in 2002 by Ridge Shinn and Gearld Fry. Harrier Field Farm's bulls, embryos and females have been sold to farmers and ranchers in many parts of the U.S. The farm address and contact information is listed below.

2009 DEVON CALENDAR
