

Soil Nutrient Management Field Day

Best Western Hotel Culpeper, Va

8am– 4pm November 19th, 2011

Cost -\$30

Sponsored by :

Register
Now

Hurry up and get registered now to hear Key note speaker Dr. Cris Teutsch, Professor of Forage management at VA Tech, discuss *Managing the Nutrient cycles within a pasture system*.

Also hear Dr Allen Williams who will explain what Sumagrow is and will review field trial results of the Sumagrow products at Lakota Ranch and around the country.

Consulting agronomists Charlie Thornton and Timothy Woodward of Tellus Consulting will discuss how to perform on farm product evaluation, and how the current and future Sumagrow trials at Lakota have been designed to provide useful and unbiased information.

After digesting the information shared by these experts in soil and forage management we will digest some Certified Devon Beef provided by Lakota Ranch and then travel out to Lakota to see on going gain trials comparing pastures treated with NPK, Broiler litter, and Sumagrow. Jeremy Engh of the Lakota Bull Test has been running steers and 18 month old bulls in test groups on pastures receiving different treatments. We will evaluate pasture differences and gain variations in the test groups. Please join us.....

For more on  visit www.sumagrow.com

For more on the Lakota Bull Test visit www.LakotaBullTest.com

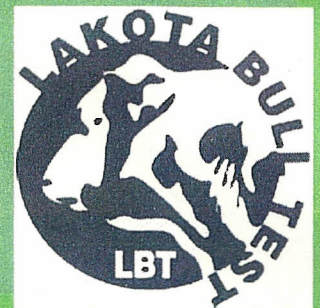

Send \$30 to Lakota Ranch
